French Encryption Declaration

App Name: Shared List
Bundle Identifier: it.tekware.sharedlistapp
Developer: Tekware

Description of the App:
Shared List is a consumer productivity application that allows users to create and share lists.
The app synchronizes list data across devices and sends notifications when shared lists are updated.

Use of Cryptography:
The application uses standard, publicly documented cryptographic algorithms to protect user-generated content.
Cryptography is implemented at the application level to encrypt data before transmission and storage.

Algorithms Used:
- XSalsa20-Poly1305
- Curve25519
- Ed25519

These algorithms are implemented using the open source TweetNaCl library.

The application does not use proprietary or non-standard cryptographic algorithms.
The cryptography is not used for military purposes.

This application is intended for consumer use and complies with applicable French and European Union regulations regarding the use of cryptography.
